Hampton Entrance Doors

All our Doors are made in the Netherlands. We have more than a thousand different door models including interior doors and exterior doors. Entrance doors are produced from Merbau Hardwood timber. Each design is confirmed with technical drawings. Wood is carefully kiln dried to a specific moisture content to ensure that it will reach optimum stability and durability. This process takes place in our own factory based kiln dry facility so that we have 100% control at this critical stage.

Our main construction and connection method typically uses a wooden dowel system. This system has been proven to give the same results as more traditional methods like mortise and tenon but we find it more efficient. Whether interior or exterior joinery, light or heavy duty, we use only one type of glue, a D4 class two component glue system. Using this type of glue system will ensure the strength and durability of the joinery.

Our standard operating procedure requires regular checking throughout our production process and after completion making sure that your product is delivered to the highest standards.

Hampton Internal Doors

Our interior doors are produced using an engineered core with an MDF top layer and are supplied only primed in either white or black colours. These doors have a choice of different door and panel profiles and are available in 40mm thickness. 35mm thickness is available on request as not all profiles allow for the change in thickness to the door.

We also custom make door sizes up to 2500mm in Height and widths up to 1300mm

Alan Millyard Entrance Collection

Our high thermal efficiency doors offer lots of advantages when compared to contemporary veneer or solid wood exterior doors. These doors are produced using an aluminium layer sandwiched between high quality exterior plywood. The core of the door consists of a hardwood framework around an extruded polystyrene sheet (XPS). The aluminium sheet acts as a water barrier to stop moisture penetrating the core of the door, to help prevent bowing or warping. The XPS sheet gives the door its high thermal efficiency. The hardwood frame can be ordered to a width to suit all hardware in the market today and also offers the possibility for re-sizing of the door.

HAMPTON DOORS WARRANTY TERMS & CONDITIONS

HAMPTON DOORS, will not be responsible for repainting, refinishing or similar actives involved & replacing of glass panels. Timber Doors **HAMPTON DOORS**, warrants to the original consumer the quality of workmanship & materials of timber items to be free from defects which may render the product unserviceable for six (6) years from date of purchase. To comply within Limited Warranty, it is the consumer's responsibility to properly care for & protect all timber products: * Immediately after fitting, & prior to hanging, the entire door, interior & exterior, top & bottom edges & hinge checkouts, must receive a minimum of two (2) coats of undercoat & two (2) coats of Oil paint or equivalent grade of recommended paint, varnish, or sealer to prevent undue absorption of moisture which may cause warping to occur. Acrylic, Water & Solvent based primer / paints or thinner are not suitable for treatment of Timber Doors. * Texture and colour variations do not constitute defects, as timber is a natural product. * Doors must be stored flat, in a dry place, avoid freshly plastered rooms or other damp areas, and not in direct sunlight. * All doors are supplied unfinished. * Regular maintenance to prevent breakdown and exposure to the element should be provided to prevent deterioration. * Doors must be inspected upon arrival for visible defects and all claims based thereon must be filled within seven (7) days. No warranty applied if the door has been altered. * A change in climatic condition can cause slight movement in the component of some solid timber doors, these are not considered a defect. * Warping refers to distortion within the door itself and not to its relationship to the doorjamb or frame in which it is hung. Warp exceeding 5mm shall be considered a defect. **HAMPTON DOORS**, agrees to repair or replace at its option, unfinished and in the form originally supplied and without charge, any door found to be defective within the meaning of the warranty. **HAMPTON DOORS**, or the Seller will not be held responsible for charges of hanging, painting or other charges arising from the replacement of doors. **HAMPTON DOORS**, recommends that if your door receives direct sunlight it should be painted in a LIGHT reflective colour, DARK colours may cause shrinkage due to change of moisture content. LIGHT coloured paint is a more durable finish for harsh conditions. *All Entrance doors must be hung in a Weather Protected areas. Water damage will void our warranty. * We recommend that a minimum of 3 hinges to be used on Standard Entrance Doors and 4 hinges on all oversized Doors. * Door profiles can change without notice due to Stock availability. Every effort will be made to maintain our Standard profiles. This will not be considered a defect. Solid Timber Joinery Doors have Solid timber Styles, Rails and Mullions with laminated timber or MDF veneered fielded panels Engineered Joinery doors use veneered laminated timber styles, rails & mullions with veneered MDF fielded panels. Suitable for either paint or stain. (For internal use Only) Experience has demonstrated that warp occurs after doors have been delivered to storage or building sites, it is usually due to improper storage or adverse moisture conditions after hanging & not to faulty manufacture. The manufacturer will accept no responsibility for doors when moisture content of the timber falls below 10% or exceeds 16%. Colour Photograph as shown in this catalogue do not always reflect the actual true colours. All Factory glazed doors comply with Australian Glazing Standard AS 1288-2006

EXCLUSIONS The guarantee against warp does not apply to the following *35mm and 40mm thick doors wider than 920mm or higher than 2140mm *Doors that are improperly hung or do not swing freely. *External doors which have been painted dark colours or different colours on each face.

MAXIMUM ALLOWABLE TRIMMING OF DOORS 10mm each side from solid constructed joinery engineered doors 30mm each side from solid timber joinery doors with 130mm styles 20mm each side from solid timber joinery doors with 110mm styles 30mm from either the Top or Bottom rails Anything outside the above please consult with **HAMPTON DOORS**.

Pictures are for illustration purposes only, doors do not include letterboxes, handles, extra hardware, paint, intallation etc.
